

smartstock™ 300

Enhance your customer experience by providing quick & easy transaction services anywhere in your library

smartstock™ 300 combines iPod technology, peripheral hardware and Bibliotheca software to create a unique hand held device. Designed to be used by library staff, the smartstock™ 300 enables staff to help patrons borrow and return items quickly and easily during peak times, as well as change the security status of an item.

Eliminate queues

smartstock™ 300 allows staff to effortlessly decrease patron waiting times during busy periods and increase efficient customer / staff interaction by offering basic transaction functionality. The smartstock™ 300 allows items to be borrowed and returned whilst simultaneously freeing up kiosks to be used for payment and account transactions.

Deploy outside of the library

With the presence of a Wi-Fi connection to the ILS/LMS, smartstock™ 300 can be deployed anywhere, for example, to check in/out items on a mobile library, school or home delivery service.

Integrated RFID antenna and Barcode Scanner

Both patron cards and individual items can be processed using either RFID or barcode.

Mobile and Lightweight

The ultra-light case allows staff to turn a standard 4th Generation iPod Touch into a mobile handheld device, capable of being used anywhere in the library. The thin, sleek design allows the smartstock™ 300 to fit comfortably in the palm of the hand.

smartstock™ 300

Can be used anywhere

To complement the mobile, lightweight design, smartstock™ 300 connects to the library server using Wi-Fi and has a battery life of up to 10 hours, making it ideal for mobile libraries and specialist library events.

Easy to use with a familiar iOS interface

smartstock™ 300 software is 'app' based and is available as standard through the App Store. It has been designed to provide easy navigation to allow staff to help their patrons quickly and efficiently.

Automatic software updates

Updates to the software will be seamlessly deployed through the Apple App Store and instantly available to download, straight on to the iPod.

Specifications

Dimensions (combined):	w: 128mm/ 5" d: 68mm / 2.7" h: 20mm / 0.8"
Weight:	0.11kg/0.2lbs.
Data:	WiFi
Standards & Compliance:	FCC-Part 15, CE, C-Tick (N14052), RoHS
Software:	smartstock™ 300 app is available to download via the App Store. liber8.smartstock 300 is required to provide the interface between the device software and the library ILS/LMS via SIP2.
Drop tests:	Withstands multiple 2 metre drops
Battery type:	Internal Rechargeable Lithium-Ion 3.7V Capacity 1800mAh Charge time up to 10 hrs.
What's in the Box?	1 x smartstock™ 300 case 1 x Single Bay Charging Dock 1 x International Power Adaptor <small>*iPod touch may not be sold by Bibliotheca in your region, please clarify with your local sales office or official Bibliotheca partner</small>
